**"BECAUSE WE CARE" PRESURGICAL EVALUATION**

Just as your physician would order certain tests prior to your surgery, we can use the latest technology to do these tests on your pet and have the results before the procedure begins. The safety considerations of doing pre-anesthetic labwork cause us to give it the highest recommendation. Hopefully, these tests will be normal, and they will give us a reference point for comparison if tests are ever needed later in your pet's life. (Circle the number to select)

- 1. GOOD : Complete Blood Count & 3 Chemistries\*.....\$39.10

**"REDUCE THE STRESS" DURING AND AFTER THE PROCEDURE**

There are things we can do to lessen the stress on your pet and help it to recover more quickly. They are all recommended, but we especially recommend these for older, ill, or debilitated patients.

- 1. IV Catheter (\$15) and IV Fluids (\$13-\$16)-(To compensate for water being withheld and to maintain kidney function)    \$28.00-31.00
- 2. Heated Recovery Compartment-(Body temp drops during surgery. The floor is warm and toasty. For pets up to 45lbs.)    \$2.00
- 3. "Cozy Cushion" in lieu of papers (Can also be used as a blanket to keep pet warm while waking up.)    \$2.00
- 4. I decline all the above.
